

FACT SHEET 8 CARE OF GRASS

The Hirer shall ensure that no vehicles drive on the grass without the prior permission of the Parks Operations Manager. Vehicles shall be parked on gravel or gravel areas at all times, unless their positioning is crucial to the event.

Vehicles that are given permission to drive on the grass shall be driven carefully and at no more than 10 mph. Vehicles shall avoid driving under the canopy of trees, making tight turns, rapid braking or acceleration. The aim is to ensure that there is no damage to, or rutting of the grass surface.

No plastic or rubber carpet underlay shall be placed on the grass at any time. Permeable breathable ground cover sheets may be used such as Mypex. Coconut matting or similar materials shall not be laid on the grass for more than 3 consecutive days.

All wooden flooring shall incorporate an air gap of a minimum of 10cm.

No wooden flooring shall be laid on the grass for more than 5 consecutive days.

No cooking barbeques or fires shall be permitted unless permission has been given by the Parks Operations Manager prior to the event.

No fuel, chemicals or other substances that may harm the grass, shall be positioned on grass areas.

No aggregate or shale to be spread directly on grass.

If extreme weather conditions are experienced prior to, or during the event, the Parks Operations Manager reserves the right to relocate the event and in the worse case scenario, cancel, close or change the date of the event
